# Two-Post Tuesday

Two-post lifts are particularly well suited for light, medium and even certain heavy duty vehicle lifting applications, including large commercial vans as well as smaller heavy duty vehicles, such as utility vehicles, pick-up trucks, and para-transit vehicles. They are particular known for optimizing workspace in the shop as well as quick and easy adjustment.

## Safety, Stability and Convenience

## Features of Two-Post Lifts from Stertil-Koni

- Peak performance and safety via symmetrical, open floor design
- Single and double telescopic lifting arms
- Intelligent synchronization between the posts starts at a height difference of just 9/16 of an inch
- Lifting capacities from 16,000 lbs. to 30,000 lbs
- Reliable hydraulic technology for smooth, efficient operation
- Fast lifting and lowering
- Independent mechanical locking system engages at 8" above floor level for additional safety
- Robotically welded for ultimate lifting precision and manufactured with high-grade carbon steel
- All critical components shielded in the posts and in over-head aluminum tubes
- ALI/ ETL Certified
