

Wireless Wednesday

Stertil Koni Official Sponsor

Wireless Mobile Column lifts are all about performance and safety.

They are ideal for lifting a broad range of vehicles, including trucks, buses, forklifts, construction, mining, off-road, military and even airport tugs.

No Wires. No Hassles

Consider these key advantages: No external power source is required to operate them and no interconnecting cables necessary. Therefore, there is no risk of operator tripping – all with minimal set up time.

Features of Wireless Mobile Lifts from Stertil-Koni

- Maximum access to the vehicle, with no risk of tripping
- Deep cycle batteries can be charged with regular 110 VAC, and on average only need to be recharged approximately once every two weeks.
- Hydraulic pallet jack mechanism with patented overload protection
- Fixed synthetic front wheels lower floor loads
- Patented “turtle” system with normal or reduced lowering speeds for greater control
