

# MOBILE MONDAY

Stertil Koni Official Sponsor

**stertil** KONI

Mobile column lifts are ideal for most shops and perfect for safe, efficient and versatile lifting assignments across a broad range of vehicles. From buses, trucks and military vehicles to utility trucks, airport tugs, off-road construction, mining vehicles and more, mobile column lifts are a great way to make light work of heavy duty lifting.

What's more, mobile column lifts are indeed mobile – easily transported across the shop floor or across town.

## No Wires. No Hassles

Consider wireless mobile columns. These are extremely safe because no external power source is required to operate them and no interconnecting cables are needed – hence no risk of tripping and all with minimal setup time.

## Features of Mobile Column Lifts from Stertil-Koni

- Lifting capacity from 16,500 lbs. to 40,000 lbs. per column depending on model
- Reliable hydraulic technology for smooth, efficient operation
- Fast lifting and lowering, with some models reaching a height of 73 inches in under 90 seconds
- Unique synchronization
- Hydraulic pallet jack mechanism with patented overload protection
- Mechanical locking system for additional safety
- Connect up to 8 lifts in a single set in a wireless configuration
- Connect up to 28 mobile columns in a single set in the cabled lift configuration
- ALI/ ETL certified
